LIST OF CONTENTS

Number 1

K. Janulewicz	1	Transmission of broadband saturable absorbing mixture for 10.6 μm nanosecond pulses
Ming-Xia Guo, Guan-Rong Tan, Wen-Xia Yang, Yan Sui, Ru-Lian Fu and Gui-Yun Kai	9	Measurement of linewidth of two-photon Doppler-free optoacoustic signal and influence of collision broadening
S. Cacoullis and M. B. Dolan	13	The measurement of optical constants of volatile liquids
S. Fonti, A. Bianco, E. Bussoletti, L. Colangeli, M. Lagara, V. Mennella, V. Orofino and G. Scamarcio	19	Raman spectra of different carbonaceous materials of astrophysical interest
J. Maserjian, F. J. Grunthaner and C. T. Elliott	27	LWIR detector arrays based on *nipi* superlattices
S. P. Varma and Joginder Singh	33	Radiometric measurement on rotating object
Sudha Gupta, Vishnu Gopal and K. C. Chhabra	41	Carrier diffusion limited MTF of a back-illuminated PV detector array
K. Q. Zhang, R. Hunneman, J. S. Seeley and G. J. Hawkins	45	Investigation of ultra wideband multi-channel dichroic beamsplitters from 0.3 to 52 μm
S. Cacoullis and M. B. Dolan	55	The optical constants of di-iso-octyl phthalate and di-*n*-butyl phthalate
Yu Fuju, Xu Sanbao and Zhang Shuming	61	Topographic methods of studying defects in $Hg_{1-x}Cd_xTe$ crystals
Y. Hait and Y. Nemirovsky	71	A modified and systematic approach to noise equivalent temperature difference derivation for infrared focal plane arrays
E. Abramof, S. O. Ferreira, C. Boschetti and I. N. Bandeira	85	Influence of interdiffusion on *N*-PbTe/*P*-$Pb_{0.80}Sn_{0.20}Te$ heterojunction diodes
Research Note **J. Blum, Ch. Hajduk, D. Lemke, A. Salama and J. Wolf**	93	High-energy radiation effects on the ISOPHOT far-infrared detectors

Number 2

T. Herter	97	Optimal sampling and sensitivity limits of integrating detector arrays in a space environment
J. Piotrowski and T. Niedziela	113	Mercury zinc telluride longwavelength high temperature photoconductors
Robert L. Lucke	121	Hardware image motion compensation for a scanning, space-borne sensor
H. C. van der Mei, J. Noordmans and H. J. Busscher	143	The influence of a salivary coating on the molecular surface composition of oral streptococci as determined by Fourier transform infrared spectroscopy
You-wen Zhang	149	Quantitative measurement of radiation properties for opaque and semi-transparent greybodies
J. R. Birch	155	Imperfect optical figure in Fourier transform spectroscopy
Michael E. Thomas	161	Infrared- and millimeter-wavelength continuum absorption in the atmospheric windows: measurements and models

P. L. Polavarapu, P. G. Quincey and J. R. Birch — 175 Circular dichroism in the far infrared and millimetre wavelength regions: preliminary measurements

K. H. Michaelian — 181 Step-scan photoacoustic infrared spectra of kaolinite

H. L. Nordh and G. Olofsson — 187 A liquid helium cooled Fabry–Perot spectrometer for ballon-borne astronomical observations

Technical Note
J. R. Birch — 195 The far infrared optical constants of polyethylene

Number 3

A. Leupin, H. Vetsch and F. K. Kneubühl — 199 Investigation, comparison and improvement of technical infrared radiators

P. I. Baranskii, O. P. Gorodnichii and N. V. Shevchenko — 259 IR optical absorption and reflection spectra in narrow gap semiconductors

P. M. Nikolić, Lj. Živanov, O. S. Aleksić, D. Samaras, G. A. Gledhill and J. D. Collins — 265 FIR optical properties of single crystal Ba- and Sr-hexaferrite

I. Ursu, R. Alexandrescu, I. Morjan, I. N. Mihailescu and J. Tlaskal — 271 Low-power-laser driven ultrafine silicon nitride production in a flowing system

M. J. Padgett and R. J. Butcher — 279 Frequency measurements in the 9 μm spectrum of CF_3Br

P. Kashyap, M. Jain and H. K. Sehgal — 285 Characterization of flash evaporated $Hg_{1-x}Zn_xTe$ films

Technical Note
I. Mukhopadhyay, R. M. Lees and K. V. L. N. Sastry — 291 Detection of weak microwave and millimeter wave transitions in the C–O stretch state of methyl alcohol

Number 4

Review
Janusz M. Pawlikowski — 295 Diluted magnetic semiconductors based on II–VI compounds for photovoltaic detector applications

Harald H. Gröbke — 307 Theory of photon assisted tunneling

Rachana Kumar, Vishnu Gopal and K. C. Chhabra — 323 Doped surface layer characteristics for HgCdTe photoconductive detectors

V. Tank and H. Dietl — 331 Multispectral infrared pyrometer for temperature measurement with automatic correction of the influence of emissivity

Preeti Kashyap, Mukesh Jain and H. K. Sehgal — 343 Properties of $Hg_{1-x}Zn_xSe$ ($0.09 \leqslant x \leqslant 1.0$) thin films prepared by flash evaporation technique

M. M. Pradhan, R. K. Garg and Manju Arora — 349 Far infrared absorption studies of high *Tc* superconducting material $YBa_2Cu_3O_{7-x}$

J. Pola, Z. Bastl and J. Tláskal — 355 Infrared-laser induced production of silicon coating via reaction of silane with trifluoroacetic acid

P. J. King, B. W. James, I. S. Falconer and L. B. Whitbourn — 359 A novel cw optically pumped submillimeter laser

B. Heimgartner, P. Leuenberger, H. U. Wiedmer, M. Zweiacker and F. K. Kneubühl — 363 Energy levels of a particle in an infinite potential well with identical square-potential barriers

Feng Weiting and Yan Yixun — 371 Temperature effects on the refractive index of lead telluride and zinc selenide
